ABOUT ME

Senior Unity Developer for mobile, desktop and consoles using Unity and C#. Good knowledge of C++. Great skills in game prototyping, people training, and leadership.

WORK EXPERIENCE

SENIOR UNITY DEVELOPER - TOOLS PROGRAMMER

Lockwood Publishing

JUN - 2021
PRESENT

DisplayTool - Internal tool made on Unity with some C++ puglins used by the Art and Marketing teams to create and test content that would be launched on the Avakin Life game.

Thumbnails Generation automation - Planned, prototyped and developed a feature to automatically standardize and generate the shop thumbnails.

Maya and DisplayTool integration - Developed a system where the artists can export and test the created animation package on the tool. That integration helped to improve the art workflow, turning a process that usually takes minutes into a single click of a button directly from Maya.

Version Control Automation - a system to run basic and custom version control commands inside the company's application or Unity Editor.

CO-FOUNDER / LEAD UNITY DEVELOPER

Channel3 Collective

JAN - 2021
PRESENT

A company that I've created as a hobby to develop games in my spare time.

I Was Lost - a game that combines 2D mazes, sliding puzzles, and narrative. A demo is live on Steam. The final game should be released by the end of the year also for Xbox.

Created the Level Editor where users can share their levels on discord.

Created the Save and Load system as a package so it can be used in future games.

Integrated the Steam achievements API.

UNITY DEVELOPER / C++ GAME DEVELOPER

Miniclip

OCT - 2018
JUN - 2021

8 Ball Pool Trickshots - developed the features: Daily bonus, Show Facebook friends' position on the map and an Improvement on in-game controls which was later applied to the company's main game. A feature to predict the easiest possible shot, this became one of the major game's mechanics used to give bonuses, trophies and ingame consumables.

Mentoring new joiners on a daily work bases and helping them to quickly integrate into the company.

Created the coding best practices for Unity and C# also worked in a Unity Guide & Best Practices for artists.

Top Down Golf - Worked almost a year with Cocos2D and Objective-C. Helped to develop the IA simulation mimicking a player aiming, a feature to challenge your Facebook friends and Leaderboards.

EDUCATION

POSTGRADUATE LATO SENSU - SPECIALIZATION IN ANIMATION

SENAC Campus Santo Amaro

OCT - 2014
DEC - 2015

Focusing on the development of animations for games, I did the institution's first work of the kind on this subject.

TECHNOLOGY IN DIGITAL GAMES

SENAC Campus Santo Amaro

JAN - 2009
JUN - 2011

I developed a game called River Raid Remake (now Retro Raid) inspired by the classic Atari game, this game is a 3D version with the option to change to the classic 2D view. Also developed a procedural world generation and enemies IA.

MULTIMEDIA AND WEB GAMES TECHNICIAN

SENAC Lapa Scipao

JAN - 2008
DEC - 2008

I developed an advergame inspired by the 2D GTA using Adobe Flash, where the player should make a car delivery respecting the Brazilian traffic laws and before running out of gas.

EXTRA

VOLUNTEER GAME DEVELOPMENT TEACHER.

Marrs Academy

JUN - 2021
PRESENT

*Started a pilot Game Development Class with two students during the pandemic and later invited other teachers to voluntarily write classes in several tech areas (coding, art, marketing, etc).
Joining my old partner from Marrs Studio we'll publish these classes for free in a project called Marrs Academy.*
